

# Mane Australia

---

*There is no guaranteed cure for hair loss, but with Mane you can have instantly thicker, natural looking hair in seconds; without the need for expensive clinical treatments, drugs or painful transplant surgery.*

## Applying Mane

---

### *A Step By Step Guide*

#### **Step 1:**

Shampoo hair, using a good conditioner and completely dry hair.

#### **Step 4:**

When the thickener has completely dried, seal the area with Mane Seal & Control and allow to dry. Repeat the process for each area being thickened.

#### **Step 2:**

Using a wide toothed brush or comb, brush the hair. Select the area to be thickened and brush upwards, holding in position.

#### **Step 5:**

Once the hair is completely dry, style as desired. Feel free to brush your hair or use your usual styling products.

#### **Step 3:**

Shake can well. Spray the thickener across the base of the thinning hair (not directly onto scalp) until sufficient coverage is achieved. Allow to dry for a minute.

#### **Step 6:**

Finally, apply a light spray of Mane Seal & Control and allow to dry.

---

## *General Tips*

### **Follow the application instructions**

For best results, always follow the application instructions. Mane Hair Thickener should be sprayed from a distance of approximately 30cm (12 inches), this will help achieve consistent coverage.

### **Can blockages**

Like all aerosols, Mane is propelled through the nozzle by compressed gas. To avoid clogging the nozzle, avoid only depressing the nozzle halfway. Should the can nozzle become clogged, try holding the can upside down and spraying for a few seconds. This will send gas through the nozzle to clear it. Should this fail, try removing the nozzle and soaking it in warm water. In the unlikely event that you still experience problems, contact us at [Info@ManeAustralia.com](mailto:Info@ManeAustralia.com) and we will send you a replacement.

---

## *General Questions*

### **What is Mane?**

Mane is a micro-fine cosmetic powder for making fine or thinning hair look thicker. It instantly increases the apparent thickness and density of the hair, so creating a natural finish. Mane dramatically adds texture and volume to any kind of hair, Mane is the original and most effective product of its kind.

### **How do I use it?**

Mane must be applied when the hair is clean and dry and should be sprayed through the hair roots. It is not necessary to over spray the hair lengths, after applying your hair will look fuller, often completely removing any noticeable bald or thinning areas.

### **How often should I wash my hair?**

For best results you should shampoo your hair every one to two days to increase the effectiveness of the product and maintain clean, healthy hair.

### **How long should a can last?**

This may vary from person to person depending on their requirements with an average of 120-150 applications per can of Mane Thickener.

### **Can you use other products with Mane?**

Yes. Mane is all organic so you can use any products you like. It is recommended by doctors and is compatible for use with other hair loss medication and styling products.

### **When do you apply Mane if you use a styling gel or similar product?**

The best way to use the Mane is to use it on clean hair.

1. Shampoo hair and dry completely.
2. Spray thickener across the base of the thinning hair until sufficient coverage is achieved.
3. Let the thickener dry, then apply the Mane Sealer and Control and let it dry again.

Now you can style your hair with any other product like styling gel, mousse, wax etc. See “Using Mane” for full directions.

### **What does Mane Seal & Control do?**

Mane Seal & Control has been specially formulated to be used after applying the Mane Hair Thickening Spray, to hold and seal the Thickener in place to give your hair that fuller natural look. It also protects Mane from rubbing off or running in the wet.

### **Can Mane be used to cover my white growing hair?**

Yes, Mane is perfect to cover white hair, simply shake the can well and spray on to the white growing roots, (with scalp protection).

### **If I have brown hair with subtle blonde highlights, is Mane for me?**

Yes, apply Mane (matching your roots colour) on to the roots of your thinning area and brush your hair with a wide comb, it will perfectly blend with your hair and will preserve your subtle highlights.

---

## ***Common Concerns***

### **Will Mane run in the wet?**

Once Mane Hair Thickener is sealed with Mane Seal and Control, it is water, rain, wind and perspiration proof. We do recommend however, that wet hair is allowed to dry slightly before any rigorous towel drying takes place.

### **Will Mane rub-off on my hand or pillow?**

Once it is sealed with Mane Seal and Control, Mane should not rub off within reasonable treatment. If you do notice Mane coming off at all, you are probably using too much Hair Thickener or not enough Seal and Control.

### **How do I wash Mane out?**

Mane can be washed out using normal shampoo and warm water. Simply give your hair a thorough shampoo and rinse as normal. Once the hair is completely dry, the product can be re-applied.

### **Can Mane harm my scalp?**

Mane will not harm your hair, scalp or impede normal hair growth. It is a non-allergenic product, the ingredients of which have been tested and used in many cosmetic and skin applications such as lipsticks and eye make-up. Mane has been widely used for over thirty years in the entertainment industry and by many thousands of the general public without any negative side effects.
